

Editorial

The Cerrahpaşa Medical Journal adopted a new publishing model in 2025, transitioning to continuous publication. Under this model, once an article is accepted for publication, it will receive a DOI number that includes the year, volume, issue, and an electronic locator number. As soon as an issue is closed, the next one will start automatically, ensuring that authors do not have to wait for the next issue to see their work published.

Accepted articles will be published online on our website as soon as they are ready and will always be freely accessible. We recognize that, beyond advancing scientific knowledge, publishing is also crucial for young researchers in demonstrating their academic achievements. Our continuous publication model facilitates immediate publication, helping authors promptly integrate their accepted articles into their academic promotion files.

We eagerly anticipate your research submissions and are committed to providing a swift review process and immediate online publication in 2025.
